

**Project Title:**

**Monte Carlo simulations of cosmic ray acceleration by relativistic shocks**

**Name: Donald Cameron Warren III**

**Laboratory at RIKEN: Astrophysical Big Bang Laboratory**

---

No jobs were executed on RIKEN computers this fiscal year. We expected that our Monte Carlo code would grow in complexity to the point where supercomputers would be faster than our office's machines. However, we did not implement those code changes last year, so we were able to perform all necessary calculations on our local desktop computers.
